

Hyde Marine to Participate in Webcast: Ballast Water - the Cost of Compliance

PITTSBURGH - December 13, 2016 - On December 2, 2016, the US Coast Guard approved a ballast water management system that will legally comply with US regulations for commercial ships trading in the United States - which represent an estimated 6% of global imports and exports - thereby immediately changing the game for shipowners who have been seeking more certainty as they plan capital expenditures.

Join *IHS Fairplay's* safety and regulations editor John Gallagher and a panel of experts representing vessel operators, class societies, and the equipment makers themselves to discuss the latest thinking on how the news from the US, along with recent regulatory changes at the IMO, can be used by owners, operators, and charterers to help plan for these million-dollar investment decisions.

Panel members include Mark Riggio, senior market manager, Hyde Marine, Ginger Garte, America's environmental & sustainability director, Lloyd's Register Marine and Offshore, and Kathy J. Metcalf, president and CEO, Chamber Shipping of America.

This webinar will take place on the: 15 Dec 2016 at 15.00 GMT

About Hyde Marine

With more than 100 years in the maritime industry and pioneering development of ballast water treatment technologies, Hyde Marine, the trade name of Calgon Carbon Corporation's (NYSE:CCC) Calgon Carbon UV Technologies LLC subsidiary, has become the leading U.S. manufacturer and educator regarding regulations, technologies, installation experiences, and challenges facing this sector. Since its initial launch in 1998, the Hyde GUARDIAN® BWTS has rapidly emerged as an industry leader featuring mechanical separation followed by UV disinfection - with more than 460 Hyde GUARDIAN® units sold to date for installation in various ship types and sizes around the world. For more information, visit www.hydemarine.com.

About Calgon Carbon Corporation Pure Water. Clean Air. Better World.

Calgon Carbon Corporation (NYSE:CCC) is a global leader in innovative solutions, high quality products and reliable services designed to protect human health and the environment from harmful contaminants in water and air. As a leading manufacturer of activated carbon, with broad capabilities in ultraviolet light disinfection, the Company provides purification solutions for drinking water, wastewater, pollution abatement, and a variety of industrial and commercial manufacturing processes. Calgon Carbon is the world's largest producer of granular activated carbon and supplies more than 100 types of activated carbon products - in granular, powdered, pelletized and cloth form - for more than 700 distinct applications. With the recent acquisition of complementary wood-based activated carbon and filtration media capabilities located in Europe, Calgon Carbon becomes an even more global and diverse industry leader in activated carbon, reactivation, and filtration media in the form of diatomaceous earth and perlites. Headquartered in Pittsburgh, Pennsylvania, the Company employs approximately 1,400 people at 21 manufacturing, reactivation, and equipment fabrication facilities in the U.S., Asia, and in Europe, where Calgon Carbon is known as Chemviron. For more information about Calgon Carbon's leading activated carbon, filtration media, and ultraviolet technology solutions, visit www.calgoncarbon.com.

This news release contains historical information and forward-looking statements. Forward-looking statements typically contain words such as "expect," "believe," "estimate," "anticipate," "should", or similar words indicating that future outcomes are uncertain. Statements looking forward in time, including statements regarding our ability to successfully complete testing of our UV-based ballast water treatment system under U.S. Coast Guard methods, and ultimately obtain

U.S. Coast Guard Type Approval for our ballast water treatment system, future growth and profitability, price increases, cost savings, broader product lines, enhanced competitive posture and acquisitions, which are included herein and those which are included in the company's most recent Annual Report pursuant to the "safe harbor" provision of the Private Securities Litigation Reform Act of 1995. They involve known and unknown risks and uncertainties that may cause the company's actual results in future periods to be materially different from any future performance suggested herein. Further, the company operates in an industry sector where securities values may be volatile and may be influenced by economic and other factors beyond the company's control. Some of the factors that could affect future performance of the company are higher energy and raw material costs, costs of imports and related tariffs, labor relations, availability of capital and environmental requirements as they relate both to our operations and to our customers, changes in foreign currency exchange rates, borrowing restrictions, validity of patents and other intellectual property, and pension costs. In the context of the forward-looking information provided in this news release, please refer to the discussions of risk factors and other information detailed in, as well as the other information contained in the company's most recent Annual Report.
