Hyde Marine to Host a Ballast Water Symposium in New Orleans, LA

Hyde Marine to Host a One-Day Informational Seminar on Ballast Water Regulations, Compliance and Implementation to be Held in Conjunction with the International Workboat Show

PITTSBURGH, PA - November 4, 2016 - Hyde Marine today announced it is holding a one-day informational seminar on ballast water regulations, implementation requirements under the US Coast Guard regulations and the IMO Ballast Water Management Convention, and providing key information from the lessons learned from their more than 460 units sold.

With the recent ratification of the IMO Ballast Water Management Convention by Finland and Panama, the threshold for entry into force of the Convention has been exceeded. That means that all ships flying flags signatory to the Convention, as well as all vessels trading in countries signatory to the Convention, must begin to comply with the Convention on September 8, 2017.

With ambiguity still surrounding the issuance of US Coast Guard Type Approvals and the question of how the Alternate Management Approval program will be affected once such Type Approvals are issued, the industry seems to have more questions than answers. As a market leader, and a technical pioneer in the field of ballast water treatment, Hyde Marine has been at the center of both the questions and the answers for much of the last 12 years.

"Now is the time for honest dialog and a path forward," said Mark Riggio, Senior Market Manager for Hyde Marine. "Hyde Marine wants to provide a forum for regulators, engineers, installers, equipment providers and most critically ship owners to sit down and discuss how we are going to get this done."

The symposium will be held from 12 p.m. until 5 p.m. at the J.W. Marriott New Orleans hotel on Monday, November 28th. Space is limited so please contact Events@hydmarine.com to request an agenda or to reserve your space. There will be no cost for the event, and all are welcome to pre-register for the event. Because of space constraints, those who do not pre-register may not be able to attend. Lunch will be provided courtesy of Hyde Marine.

Hyde Marine is one of the world's leading ballast water treatment (BWT) technology companies with more than 460 orders for its ballast water treatment system including nearly 100 retrofit systems and more than 300 vessels with fully installed, commissioned and working ballast water treatment systems. Visit www.hydemarine.com for more information.

About Calgon Carbon Corporation

Pure Water. Clean Air. Better World.

Calgon Carbon Corporation (NYSE:CCC) is a global leader in innovative solutions, high quality products and reliable services designed to protect human health and the environment from harmful contaminants in water, and air. As a leading manufacturer of activated carbon, with broad capabilities in ultraviolet light disinfection, the Company provides purification solutions for drinking water, wastewater, pollution abatement, and a variety of industrial and commercial manufacturing processes.

About Hyde Marine

With more than 100 years in the maritime industry and pioneering development of ballast water treatment technologies, Hyde Marine, as part of Calgon Carbon UV Technologies, LLC, has become the leading U.S. manufacturer and educator regarding regulations, technologies, installation experiences, and challenges facing this sector. Since its initial launch in 1998, the Hyde GUARDIAN® BWTS has rapidly emerged as an industry leader featuring mechanical separation followed by UV disinfection - with more than 460 Hyde GUARDIAN units sold to date for installation in various ship types and sizes around the world. This news release contains historical information and forward-looking statements. Forward-looking statements typically contain words such as "expect," "believe," "estimate," "anticipate," or similar words indicating that future outcomes are uncertain. Statements looking forward in time, including statements regarding future growth and profitability, price increases, cost savings, broader product lines, enhanced competitive posture and acquisitions, are included in the company's most recent Annual Report pursuant to the "safe harbor" provision of the Private Securities Litigation Reform Act of 1995. They involve known and unknown risks and uncertainties that may cause the company's actual results in future periods to be materially different from any future performance suggested herein. Further, the company operates in an industry sector where securities values may be volatile and may be influenced by economic and other factors beyond the company's control. Some of the factors that could affect future performance of the company are higher energy and raw material costs, costs of imports and related tariffs, labor relations, availability of capital and environmental requirements as they relate both to our operations and to our customers, changes in foreign currency exchange rates, borrowing restrictions, validity of patents and other intellectual property, and pension costs. In the context of the forward-looking information provided in this news release, please refer to the discussions of risk factors and other information detailed in, as well as the other information contained in the company's most recent Annual Report.
